

STM 1 Test Kit

Dilution - Acidity - Pollution

Industries concerned

- Navy

The STM 1 kit is designed for monitoring 3 main characteristics of the lubricant on the Diesel engine operation site:

- **Dilution of lube oil with fuel oil**
- **Acidity of the aqueous phase**
- **Pollution with carbon matters**

The tests are simple and rapid, and the kit includes a detailed testing and interpretation guide so that the engineer can make immediate decisions for maintaining the Diesel engine and increasing its lifespan.

The tests conform to the French Navy STM 1 specification.

Features

The kit is housed in a **strong and light aluminum case.**

Dimensions : 57 x 43 x 10 cm

Weight: 4.5 kg

The kits include all accessories, reagents and operating manuals for performing and understanding **100 acidity and pollution tests.**

The number of dilution tests is unlimited.
