

## **CoolTest™ Kit**

Portable mini Laboratory for monitoring marine motor coolants

## Industries concerned

- Automotive
- Rail
- Marine
- Navy
- Power production

The GESERCO CoolTest™ kit is a field test kit to be used for monitoring engine cooling fluids at the place of operation of the engine.

The GESERCO CoolTest™ kit allows for monitoring 5 important characteristics of the engine cooling liquid:

- Anti corrosive agent concentration
- pH
- Chlorides content
- Hardness
- Temperature

The tests are simple and rapid, and the kit includes a detailed testing and interpretation guide. The kit is readily usable by any personnel, even nonspecialized.

## **Features**

The kit is housed in a **strong and light aluminum case**. Internal foam to secure & protect accessories.

Dimensions: 47cm x 42 cm x 13 cm

Weight: 5 kg

The kit includes all accessories, reagents and operating manuals for performing and understanding  ${\bf 100^*}$ 

**tests** unless otherwise specified.

(\*Chloride test: 30 tests)
