

CompaTest™ Kit

Kit for testing marine fuels compatibility

Industries concerned

- Marine
- Power production

The GESERCO CompaTest™ kit is intended for testing the ability of two fuels to mix and for the mixture to remain stable.

Monitoring the ability of fuels to blend together will help eliminating risks of sludge deposits, injection system failure, combustion problems and costly engine breakdowns.

The test is simple and rapid, and the kit includes a detailed testing and interpretation guide so that the engineer can take immediate decisions.

Features

- Test time: 20 minutes typical
- Dimensions: 20 x 22 x 23 cm
- Weight: 2 kg
- Power: 220 - 240 V, 0.8 A, 170 W

Product code

Compatest™ Kit: FI9001

The kit includes all accessories and consumables to perform **50 tests**.
