

Solvent DP

Solvent for water content test

Part number: WT9206

Flask of solvent DP (500 ml) for water content measurement.

Solvent DP is an anhydrous solvent to be used for diluting the samples of fluid which undergo a water content test. Solvent DP shall particularly be used when testing heavily polluted or viscous fluids (black oils, heavy fuel oils, greases...).

Solvent DP can be used with the following GESERCO reagents:

- Reagent WT p/n WT9200

Solvent DP can be used with the following GESERCO instruments:

- Aquatest
- PreciWaterTest
- UltraPreciWaterTest
- WTGC
- WaterTest
