

Water In Oil + BN Test Kit

Portable mini-lab for testing motor lubricants

Industries concerned

- Automotive
- Rail
- Marine
- Navy
- Power production
- Oil and Gas

The GESERCO Water on oil + BN Test Kit is a true portable lubricant analysis mini laboratory.

The Water In Oil + BN kit is a stand-alone solution designed for monitoring up to 4 important characteristics of the lubricant on the engine operation site:

- **Water Content**
- **Alkaline reserve (BN)**
- **Sea water presence***
- **Viscosity & Dilution***

(*Option)

The tests are simple and rapid, and the kit includes a detailed testing and interpretation guide

so that the engineer can make immediate decisions for maintaining the Diesel engine and increasing its lifespan.

Rapid Oil Test Gauge (ROTG) - Water Presence & Alkaline Reserve :

The GESERCO Water In Oil + BN test kit incorporates the new Rapid Oil Test Gauge, a documenting tester which not only provides **fast, simple, accurate results for Water in Oil and Base Number (BN)** but also makes it **easier to monitor the condition of used oils over time**.

Local features include:

- Local display of test instructions
- Memory for 1000 tests
- Instant test result evaluation
- Excess water content alarm
- Low BN alarm
- Time stamping of test results
- USB port for downloading results to a computer.

Features

The kit is housed in a **strong and light aluminum case**.
Internal foam to secure, protect accessories.

Reagents are non dangerous for transportation.

Dimensions: 47 x 42 x 13 cm
Weight: 5 kg

The kits include all accessories, reagents and operating manuals for performing and understanding **50 tests**.

(*Except sea water detection: 30 tests / Viscosity: unlimited)
